Move over horseshoes and bocce ball, there's a new game in town &ndash; sholf.

Sholf is a new hybrid of golf and shuffleboard.

Marketed by Precision Gaming LLC, the game is played with putters and golf balls on a marked mat known as the playing green.

The object of Sholf is to putt your golf balls further into the scoring end than your opponent.

Point values increase, as you get closer to the edge of the playing green. The first player or team of players to get 15 points wins.

Playing involves the strategy, competitive play and scoring of table shuffleboard.

This low-impact game can be played indoors or out and the equipment comes in its own carrying case so it can be packed up and played anywhere.
